What's in the Box?

Clinic Modules

- Oral and Dental Health M.
- Operating Rooms Module
- Diet Module
- Pharmacy Module
- Physiotherapy Module
- Patient Admission Module
- Hemodialysis Module
- Blood Center Module
- Gynecology Module
- Laboratory Module
- Central and Local Appointment System
- Nuclear Medicine Module
- Emergency Management Module
- Nursing Management M.
- Telemedicine Module

Clinic Modules

- Oncology Module
- Orthopedics Module
- PACS
- Pathology Module
- Policlinic Module
- Radiology Information System
- Radiotherapy and Chemotherapy Module
- Medical Board Module
- Social Services Module
- Sterilization Module
- Inpatient Module
- Intensive Care module
- In Vitro Fertilization
- Genetics Module
- Mortuary Management System

Administrative Modules

- Equipment Tracking Module
- Reception Module
- Revolving Funds, Invoicing and Financial Transactions Module
- Records and Archives Module
- Statistics and Reporting Module
- System Management Module
- Stock Tracking System,
- Procurement and Fixed Asset Management Module
- Cash Desk Module
- Human Resources Module
- Cleaning and Laundry Module

Integrated Solutions	•Software development and process design (Sterilization, Laundry, Chemotherapy, TPN, Catering, Cleaning Waste Management, etc.) •Central management of Information Digital Signage screens and information flow to HIMS
Integration	•Integration infrastructure design compliant to Service Oriented Architecture (SOA) •Management of all integrations by Gateway, ESB and RFID systems
Mobile Solutions	•Mobile solutions in blood-taking points and Chemotherapy •Tablet usage in emergency service, intensive care and inpatient services •Mobile application for pneumatic system •Mobile patient assistant and Location/Way finding application
Patient–Drug Usage Safety	•Wristband for inpatient and chemotherapy patients •Ensuring patient-drug usage safety by reading of drug QR code, administering personnel ID card
Operating Room Management	•Patient and operation validation check in operating rooms by reading of patient wristband with use of sterile PCs •Operation management by reading QR code of consumables in operating rooms.
